GIDEON TEIBO

Frontend Developer

PROFESSIONAL PROFILE

Dedicated and attentive Frontend Developer with over 3 years of experience in designing and implementing web applications. Talented at utilizing modern web technologies, frameworks, and libraries such as HTML5, CSS3, JavaScript, and React to create intuitive user interfaces. Proven track record of collaborating with cross-functional teams to deliver high-quality software solutions that meet client needs and enhance user experiences. Strong problem-solving skills, design skills, a passion for clean and maintainable code, and a commitment to staying updated with the latest industry trends. Seeking to influence my expertise in frontend development to contribute to creative projects in large companies and my development team in order to create a good and accessible user experience for all users. Staying up-to-date with industry trends and emerging technologies to contribute to continuous improvement and change.

CAREER SUMMARY

Freelance Developer || September 2023 to November 2023

Name: HAVEN EXPERIENCE LODGING

Website: havenexperiencelodging.com

PROFESSIONAL EXPERIENCE

During this period of time I have become confident in my abilities as a Frontend Developer but I was also able to show my other skills like PHP, Backend development, MySQL and Web Hosting. It was a wonderful experience as I got to design the user interface for the web application and I also implemented the design in the Frontend Development. Then I programmed the web application with my knowledge of PHP and database management.

Volunteer Developer || November 2022 to May 2023

Name: Yurland

Website: yurland.com.ng

PROFESSIONAL EXPERIENCE

During this period of time I needed to gain experience in the field so I worked collaboratively with designers and a project manager. I didn't have the confidence to build a FullStack web app because that was the task at that time. It took three months to implement the frontend development for the user interface and It took another four months to programme the functions for all the users in the web application. It was worth it in the end as it made me gain more confidence and skills in the field and I am still willing to learn and improve on my skills.

EDUCATION

- Currently studying Information Technology at Uxbridge College, UK
September 2023 to November 2025
